

Count Visitors to Galleries, Shops, Banks, etc.

Video Turnstile People Counting

You can now reliably record the numbers of people entering and leaving your premises. Overhead CCTV cameras track people moving through doorways, whilst our Video Turnstile units detect, count and record entries and exits.

- Monitor single doorways, double doorways, wider doorways and corridors.
- Show real-time counts on the PC.
- Generate reports in the Windows application of your choice, Excel or Access for example.
- Record counts over your chosen set intervals, for example each quarter or half hour's totals.
- Verify counts: watch the video and see marker lines flash when the system detects someone crossing the threshold.
- Choose whether or not to count children.
- Position the PC up to 1 km away from the Video Turnstile units.
- Alternatively retrieve counts remotely over a modem.
- Modular, buy only what you need now and expand later if necessary.
- Display meter option to show total visitors or total occupancy independently of a PC
- Directional counting.
- Systems can be customised to your specifications.
- Easy to install.
- No on-going charges.
- Free technical support for life.

Reliability Guaranteed

Biodata have been designing data collection systems for over 30 years and are confident that the Video Turnstile people counters are the most reliable on the market. This confidence lets us provide free technical support for life. We also offer a money-back guarantee. If you don't like the Video Turnstile people counters simply notify us within 10 days and return your purchase for a full refund.

You can verify the people counts for yourself. Simply connect the Video Turnstile unit to a TV and watch the live video. Everytime the unit detects a person entering or leaving, you will see a detection marker flash.

Use any Analysis and Reporting Software

Included with the Video Turnstile system is the Windmill data collection software. This runs under Windows and comprises a suite of programs, each dedicated to a specific task. For instance, the Windmill Logger program regularly saves counts to computer disk at the rate you choose.

The Windmill software logs and charts the people count in real-time.

Windmill can transfer the data to almost any Windows analysis or reporting software, in real-time if necessary. You are

Two Video Turnstile units which detect and count people passing through doorways or down corridors.

therefore not tied to one manufacturer's solution and can use whichever software suits your purposes best, including Microsoft Office applications.

Easy to Install and Use

The Video Turnstile system can be installed by any competent electrician. Once set up it is extremely easy to retrieve live readings using the Windmill software. Alternatively, you can view the total visitor or total occupancy counts on a small meter that can be positioned near the door or in an office.

Prices and Ordering

Systems start at £535 including:

- Video Turnstile logging unit,
- camera,
- Windmill software,
- cables,
- power supply,
- lifetime technical support.

To place an order, or discuss your requirements, call +44 (0)161-834 6688 now. We design and build the Video Turnstile units and are happy to customise systems to your specifications. For more details of Video Turnstile, or to order on-line, visit our web site at <http://www.videoturnstile.com/>
